TECHNICAL PROJECTS

Fresh Go - [Github](#) | [Live Demo](#)
FreshGo is a modern grocery shopping website designed to enhance your shopping experience. With features like recipe generation, a shopping cart, and item filtering, FreshGo makes grocery shopping efficient and enjoyable. Users can also discover drink recipes to complement their meals.
- Utilized FastAPI and localStorage for client-side encrypted user information storage.

Home Repair Service - [GitHub](#) | [Live Demo](#)
HRS is a platform connecting users with home repair services. Users can create accounts, request services, and manage payments seamlessly.
- Developed a user-friendly landing page showcasing services with Signup functionality.
- Implemented user account creation and login processes for secure access.
- Enabled service selection and payment processing for user requests.

EXPERIENCE

BEEIT, Electronics Technician   Butembo, DRC
Technician   01/2022 - 07/2022

- Worked as an electronics technician, responsible for diagnosing and repairing various electronic equipment and materials.
- Ensured all repairs were completed efficiently, improving the functionality and longevity of devices, leading to a reduction in equipment downtime and increased client satisfaction.

AYAT/Com   Beni, DRC
Intern   04/2023 - 06/2023

- Assisted in the maintenance and troubleshooting of telecommunication equipment, ensuring the smooth operation of network services.
- Collaborated with senior technicians to learn about telecom infrastructure, improving my technical skills and understanding of the telecommunications industry.
